## DISTINGUISHED SYSTEM OF COSET REPRESENTATIVES AND A SIMPLE NORMAL COMPLEMENT OF A SUBGROUP OF FINITE GROUP

E. VIRÁG

### 1. Introduction

Suppose that  $H$  is a subgroup of the finite group  $G$  and that  $N$  is a normal subgroup of  $H$  / in symbols  $N \trianglelefteq H \trianglelefteq G /$ .

A normal subgroup  $K$  of  $G$  is a normal complement of  $H$  in  $G$  over  $N$  if  $G = HK$ ,  $H \cap K = N$ .
