THE ABERRATION OF LIGHT AND THE SPACE-TIME METRICS REDUCTION IN THE CASE OF ROTATION TO CANONICAL FORM

István Huba Atilla SASS

Abstract. This paper presents the reduction to canonical form of the space-time metrics corresponding to a rotation of angular speed w round the axis Oz. An interpretation of this is also provided.

MSC 2000: 83C20

Keywords: space-time metrics, reduction to canonical form, aberration of light
