A note on a fixed point theorem of Berinde on weak contractions

G. V. R. BABU, M. L. SANDHYA and M. V. R. KAMESWARI

ABSTRACT. The aim of this note is to show that the quasi-contractions and weak contractions are independent; also it is shown that a map that satisfies *condition (B)* (newly introduced) has a unique fixed point in complete metric spaces. This note answers the open problems posed by Berinde [1].
