A note on quasi-uniformity and quasi-uniform convergence on function space

S. GANGULY, K. DUTTA and RITU SEN

ABSTRACT. In this paper our aim is to study the problem of joint continuity for different types of function spaces with respect to the topology of quasi-uniform convergence as introduced by B. K. Papadopoulos in [8]; we have also studied the relation of the function spaces with respect to $Y^{\tilde{X}}$ with the topology of quasi-uniform convergence.
