

On Γ -hyperideals in Γ -semihypergroups

S. M. ANVARIYEH, S. MIRVAKILI and B. DAVVAZ

ABSTRACT.

In this paper, the notion of a Γ -hyperideal of a Γ -semihypergroup is introduced. A Γ -hyperideal of a Γ -semihypergroup is a generalization of an ideal of a semigroup, a generalization of a hyperideal of a semihypergroup and a generalization of a Γ -ideal of a Γ -semigroup. Also, we introduce the classes of bi- Γ -hyperideals and quasi Γ -hyperideals of a Γ -semihypergroup and some properties of them are presented. Moreover, quasi simple Γ -hyperideals and minimal Γ -hyperideals in a Γ -semihypergroup are defined, and we investigate the relation between them.
