## On a second order differential equation with piecewise constant mixed arguments

## H. BEREKETOGLU, G. SEYHAN and F. KARAKOC

## Abstract.

We prove the existence and uniqueness of solutions of a class of second order differential equations with piecewise constant mixed arguments and we show that the zero solution of Eq. (1.1) is a global attractor. Also, we study some properties of solutions of Eq. (1.1) such as oscillation, nonoscillation, and periodicity.

**Acknowledgements**. We would like to thanks to Professor I. Győri (University of Pannonia, Veszprem, Hungary) for valuable comments and remarks.

This research has been carried out while Professor I. Győri was on academic leave, visiting Ankara University supported in part by The Scientific and Technological Research Council of Turkey (TUBITAK).
