

Carpathian Journal of Mathematics

CONTENTS

Vol. 35, No. 1, 2019

DORIN ANDRICA AND OVIDIU BAGDASAR

On some results concerning the polygonal polynomials 01 - 12

ALINA-RAMONA BAIAS, FLORINA BLAGA AND DORIAN POPA

Best Ulam constant for a linear difference equation 13 - 22

APIMUK BUAKIRD AND SATIT SAEJUNG

Ulam stability with respect to a directed graph for some fixed point equations 23 - 30

BILAL A. CHAT, HILAL A. GANIE AND S. PIRZADA

Bounds for the skew Laplacian spectral radius of oriented graphs 31 - 40

HATICE ASLAN HANÇER, MURAT OLGUN AND ISHAK ALTUN

Some new types multivalued F -contractions on quasi metric spaces and their fixed points 41 - 50

ADRIAN HOLHOŞ

A sequence of positive linear operators related to powered Baskakov basis. 51 - 58

CRISTINA E. HRETCANU AND ADARA M. BLAGA

Hemi-slant submanifolds in metallic Riemannian manifolds 59 - 68

CONSTANTIN P. NICULESCU

The Abel-Steffensen inequality in higher dimensions. 69 - 78

ALEXANDRU ORZAN

A new class of fractional type set-valued functions. 79 - 84

WARUT SAKSIRIKUN, VASILE BERINDE AND NARIN PETROT

Coincidence point theorems for cyclic multi-valued and hybrid contractive mappings 85 - 94

RAWEEROTE SUPARATULATORN AND SUTHEP SUANTAI

*A new hybrid algorithm for global minimization of best proximity points
in Hilbert spaces.* 95 - 102

BOYAN ZLATANOV

*Kottman's constant, packing constant and Riesz angle
in some classes of Köthe sequence spaces* 103 - 124
