

ANA MARIA ACU AND P. N. AGRAWAL

Better approximation of functions by genuine Bernstein-Durrmeyer type operators. 125 - 136

ŠTEFAN BEREŽNÝ AND MICHAL STAŠ

*Cyclic permutations and crossing numbers
of join products of two symmetric graphs of order six* 137 - 146

LARISA CHEREGI AND VICUȚA NEAGOȘ

A generalization of the Pompeiu mean-value theorem to compact sets. 147 - 152

OVIDIU COSMA, PETRICĂ C. POP AND CORINA POP SITAR

*An efficient iterated local search heuristic algorithm
for the two-stage fixed-charge transportation problem* 153 - 164

NICOLAIE LUNGU AND DANIELA MARIAN

Ulam-Hyers-Rassias stability of some quasilinear partial differential equations of first order . . . 165 - 170

DIJANA MOSIĆ

Weighted G-Drazin inverse for operators on Banach spaces. 171 - 184

ADRIAN PETRUȘEL, GABRIELA PETRUȘEL AND JEN-CHIH YAO

Coupled fixed point theorems in quasimetric spaces without mixed monotonicity. 185 - 192

HABIB UR REHMAN, POOM KUMAM AND SOMPONG DHOMPONGSA

*Existence of tripled fixed points and solution of functional integral equations
through a measure of noncompactness.* 193 - 208

IOAN A. RUS

Convergence results for fixed point iterative algorithms in metric spaces. 209 - 220

AYNUR ŞAHİN

Some new results of M-iteration process in hyperbolic spaces 221 - 232

MURAT SARI, SHKO ALI TAHIR AND ABDERRAHMAN BOUHAMIDI

Behaviour of advection-diffusion-reaction processes with forcing terms 233 - 252

NITHIRAT SISARAT, RABIAN WANGKEEREE AND GUE MYUNG LEE

*Sequential characterizations of robust optimal solutions in uncertain convex programs
via perturbation approach* 253 - 262
