

Carpathian Journal of Mathematics

CONTENTS

Vol. 36, No 1, 2020

S. AL-HOMIDAN, B. ALI and Y. I. SULEIMAN

An iterative method for solving multiple-set split feasibility problems in Banach spaces01 - 13

TRUONG QUANG BAO

Fréchet vector subdifferential calculus 15 - 26

VASILE BERINDE

Approximating fixed points of enriched nonexpansive mappings in Banach spaces by using a retraction-displacement condition 27 - 34

LIMPAPAT BUSSABAN, SUTHEP SUANTAI and ATTAPOL KAEWKHAO

A parallel inertial S-iteration forward-backward algorithm for regression and classification problems35 - 44

TAO CHEN, NAN-JING HUANG and YI-BIN XIAO

A class of parabolic evolutionary quasivariational inequalities in contact mechanics 45 - 57

C. E. CHIDUME, G. S. DE SOUZA, U. V. NNYABA, O. M. ROMANUS and A. ADAMU

Approximation of zeros of m -accretive mappings, with applications to Hammerstein integral equations 59 - 69

HAFIZ FUKHAR-UD-DIN

Existence and approximation of a fixed point of a fundamentally nonexpansive mapping in hyperbolic spaces71 - 80

THANOMSAK LAOKUL and BANCHA PANYANAK

A generalization of the (CN) inequality and its applications81 - 90

JIRAPRAPA MUNKONG, BUI VAN DINH and KASAMSUK UNGCHITTRAKOOL

An inertial extragradient method for solving bilevel equilibrium problems 91 - 107

LUONG V. NGUYEN and XIAOLONG QIN

Weak sharpness for solutions of nonsmooth variational inequalities and applications 109 - 117

M. O. NNAKWE

Solving split generalized mixed equality equilibrium problems and split equality fixed point problems for nonexpansive-type maps 119 - 126

ANANTACHAI PADCHAROEN and KAMONRAT SOMBUT

modified inertial double Mann type iterative algorithm for a bivariate weakly nonexpansive operator 127 - 139

SIMEON REICH and ALEXANDER J. ZASLAVSKI

Inexact descent methods for convex minimization problems in Banach spaces 141 - 146

YAQIN WANG, YANLAI SONG, XIAOLI FANG and TAE-HWA KIM

Split equality fixed point problems for asymptotically quasi-pseudocontractive operators147 - 157

CUIJIE ZHANG, QIAO-LI DONG and JIAJIA CHEN

Multi-step inertial proximal contraction algorithms for monotone variational inclusion problems 159 - 177
