

MARAT AKHMET, MADINA TLEUBERGENOVA and AKYLBEK ZHAMANSHIN <i>Duffing equations with two-component Poisson stable coefficients</i>	349 - 357
AUTCHA ARAVEEPORN, ARAYA KHEAWBORISUT and ATID KANGTUNYAKARN <i>Approximating G-variational inequality problem by G-subgradient extragradient method in Hilbert space endowed with graphs</i>	359 - 369
ŠTEFAN BEREŽNÝ and MICHAL STAŠ <i>On the crossing numbers of the join products of five graphs on six vertices with discrete graphs</i> ..	371 - 382
VARAYUT BOONYASRI and SANTI TASENA <i>Aggregation Function Constructed from Copula</i>	383 - 401
DAN ȘTEFAN MARINESCU and EUGEN PĂLTĂNEA <i>On the transfer of convergence between two sequences in Banach spaces</i>	403 - 410
G. MOZA and L. F. VESA <i>Analysis of interactions between human immune system and a pathogenic virus</i>	411 - 422
WORAPHAK NITHIARAYAPHAKS and WUTIPHOL SINTUNAVARAT <i>On approximating fixed points of weak enriched contraction mappings via Kirk's iterative algorithm in Banach spaces</i>	423 - 432
ADRIAN PETROVAN, OLIVIU MATEI and PETRICĂ C. POP <i>A Comparative Study between Haploid Genetic Algorithms and Diploid Genetic Algorithms</i>	433 - 458
KANYANEE SAECHOU and ATID KANGTUNYAKARN <i>Convergence theorem for an intermixed iteration in p-uniformly convex metric space</i>	459 - 475
NITHIRAT SISARAT, RATTANAPORN WANGKEEREE and RABIAN WANGKEEREE <i>Strong duality in parametric robust semi-definite linear programming and exact relaxations</i>	477 - 490
KIRATI SRIAMORN, SIRA SRISWASDI and SUPANUT CHAIDEE <i>The Non-Existence of Convex Configuration for a Given Set of Vertex-Norm in Two-Dimensional Space</i>	491 - 510
BISWAJIT TAHU, MANSI DHINGRA, SATISH KUMAR and PANKAJ KUMAR GARG <i>Levitin–Polyak Well-Posedness for Parametric Set Optimization Problem</i>	511 - 527
NGUYEN KHAC TIN <i>A note on the generators of the polynomial algebra of six variables and application</i>	529 - 539
ALI TURAB and WUTIPHOL SINTUNAVARAT <i>On the solution of the generalized functional equation arising in mathematical psychology and theory of learning approached by the Banach fixed point theorem</i>	541 - 551
TZU-CHIEN YIN, NAWAB HUSSAIN and ASIM ASIRI <i>A self-adaptive forward-backward-forward algorithm for solving split variational inequalities</i>	553 - 567
